Education

High school
    Holy Spirit High School
College
    SUNY University at Albany

Skills

- Java
- C/C++
- Java Script
- Python

Question

QUESTON 1 : What does this intrapage link do after you add it and click it?

It jump to the tag which has the same name as I put in the "herf" attribute. Such as herf="#top" will jump to the tag which name is "top"

Question 2 : which type of list did you choose and why?

I choose unordered list. Because the skills are parallel, which one at the first isn't matter, unordered list would be more reasonable than ordered list.
